CALL FOR PRESENTATIONS

23rd ANNUAL SCIENCE IN THE SOUTH CONFERENCE

SOUTHERN ILLINOIS UNIVERSITY CARBONDALE

January 25, 2019

Deadline for Presentation Submission: January 10, 2019

Office Use Only

Approved by
Committee

The Science in the South Conference Committee is inviting all educators to present any science-related topics that would be of interest to K-12 science teachers. Hands-on, applied, and activity-oriented sessions/workshops are preferred. Additionally, this year we are looking for presentations related to astronomy and implementing NGSS. Complete a form for each workshop. This form may be duplicated. Each accepted presenter will be required to pay a \$25 fee, which includes conference materials, session/exhibit viewing, breakfast, luncheon and parking pass.

You may also submit your proposal online at conferenceservices.siu.edu

Principal presenter:

Name _____

Affiliations/School _____

Mailing Address _____

City, State, Zip _____

Day Phone _____

Cell Phone _____

Email _____

I plan to attend lunch: Yes No

Dietary Needs: _____

Additional Presenter (Optional):

Name _____

Affiliations/School _____

Mailing Address _____

City, State, Zip _____

Day Phone _____

Cell Phone _____

Email _____

I plan to attend lunch: Yes No

Dietary Needs: _____

Title of Presentation _____

Program Description (exactly how you want it to appear in the program) 50 word maximum:

New Illinois Learning Standards for Science to be addressed in presentation: _____

Check the intended, most appropriate audience(s): K-3 3-5 6-8 9-12+ Administrators, Curriculum Designers, etc

Willing to Present ___ Number of Sessions (please check): 1 2 3 4

To reduce costs, presenters are encouraged to bring their own equipment. Please bring any and all laptops, projectors, etc you will need.

All rooms will be set up with tables unless otherwise specified. **Special Room Set-Up Needs** _____

SAFETY: All presentations must conform to NSTA minimum safety guidelines for presenters. Please refer to these guidelines on the back of this form. Will you be using chemicals or hazardous materials? Yes No

If yes, please describe: _____

I have read and understand the NSTA minimum safety guidelines for presenters. I promise to conform to these guidelines while giving my presentation at the Science in the South Conference.

Signature _____ Date _____

**NSTA MINIMUM SAFETY GUIDELINES
FOR PRESENTERS AND WORKSHOP LEADERS**

PREAMBLE

The National Science Teachers Association, an organization of science education professionals dedicated to the stimulation, improvement, and coordination of science teaching and learning, supports scientific safety at all levels. Presenters, workshop leaders, contestants, and authors at NSTA-sponsored activities serve as role models for other science educators. As role models, these individuals must develop, encourage, and display good safety habits at all times. A good safety role model promotes positive safety in actions, words, behavior, and deeds. Science safety is an integral part of science education and serves as a preparation for life. Accordingly, NSTA encourages teachers to offer meaningful and safe science experiences both inside and outside the classroom. NSTA requires that all presentations, workshops, and related science-education activities, be conducted in accordance with recognized safety procedures and good common sense. The intent of the safety guidelines that follow is to promote safe science practices at all NSTA-sponsored activities.

**ALL PRESENTERS AND WORKSHOP LEADERS
MUST FOLLOW THE NSTA MINIMUM SAFETY GUIDELINES**

THE FOLLOWING MAY NOT BE PART OF ANY PRESENTATION OR WORKSHOP AT AN NSTA CONFERENCE UNDER ANY CIRCUMSTANCES:

1. Parts of the body are not to be placed in danger, such as placing dry ice in the mouth or dipping hands or fingers into liquid nitrogen or molten lead. Demonstrations such as the following shall not be conducted: walking on broken glass or hot coals of fire with bare feet, passing an electric current through the body, and lying on a bed of nails and having a concrete block broken over the chest.
2. Live vertebrate animals may not be used in demonstrations or for experimental purposes. Such animals may be used only for observational purposes provided the animals have been lawfully acquired, are housed in proper containers, and are handled in a humane way following the NSTA's "Guidelines for Responsible Use of Animals in the Classroom" (NSTA Position Statement).
3. Live ammunition, firearms, or acutely dangerous explosives, such as benzoyl peroxide, diethyl ether, perchloric acid, picric acid, and sodium azide, may not be used. Commercially available firecrackers and blasting caps shall never be employed.
4. Plants with poisonous oils (e.g., poison ivy), saps (e.g., oleander) or other plants known to be generally toxic to humans are not to be used. (Resource: Human Poisoning from Native and Cultivated Plants, by James W. Hardin and Jay M. Arena. The publisher is Duke University Press, Durham, NC 27708.)
5. Experiments or demonstrations with human blood/body fluids may not be conducted.
6. Radioactive powders, liquids, or solutions are not to be used in a non-laboratory facility.

GUIDELINES FOR PREPARING YOUR PRESENTATION:

1. Practice all demonstrations or workshop procedures BEFORE presenting them to an audience or having participants try them.
2. Research and understand the properties, chemical reactions, and dangers involved in all demonstrations. Plan to use correct handling procedures for all biohazards used. Arrange to have a fire extinguisher available whenever the slightest possibility of fire exists.
3. Prepare a handout that gives participants detailed instructions about the procedures, safety precautions, hazards, and disposal methods for each demonstration.
4. Prepare photographs, slides, videotapes, and so on that show safe science practices. When preparing these materials, safety goggles and equipment shall not be removed for aesthetic considerations.
5. In planning demonstrations and/or workshops, keep quantities of hazardous materials to a minimum. Use only those quantities that can be adequately handled by the available ventilation system. Do not carry out demonstrations that will result in the release of harmful quantities of noxious gases into the local air supply in the demonstration or other rooms. The following gases shall not be produced without using a fume hood: nitrogen dioxide, sulfur dioxide, and hydrogen sulfide. Volatile, toxic substances such as benzene, carbon tetrachloride, and formaldehyde shall not be used unless a fume hood is available.
