Southern Illinois Drug Awareness Conference Back Bigger Better

Exploring SUPS: Analyzing Johnson County Data

Morgan Nickles

March 14th, 2024

Reminder:

Please scan the QR code located on the green flyer to clock in your time!

This presentation has three parts:

First, we're going to break the ice.

Then, we're going to peel back the layers.

Back Bigger Better And finally, engage in an activity - by choice.

Introduction

- Morgan Nickles, Programs Coordinator
- Programs related to youth development, substance use prevention, violence prevention, crisis intervention, and DEI (diversity, equity, and inclusion) related work
 - Service Area Includes:
 - Alexander
 - Hardin
 - Johnson
 - Massac
 - Pope
 - Pulaski
 - Union
 - Contact Information:
 - morgan.nickles@myarrowleaf.org
 - 618.658.3079 (Office)

Breaking the Ice

What brings you to this space?

Peeling back the layers

Arrowleaf

Arrowleaf is a nonprofit human services organization that works to build wellbeing for Southern Illinoisans throughout their lives so they can weather life's storms, reach their full potential, and help our communities thrive. Our work is focused on three areas essential to well-being and strong communities: Behavioral Health, Developmental Services, and Community Collaboration.

Through more than 25 programs across these three areas, we are able to support Southern Illinoisans through a wide variety of challenges that can come up at different points in life, such as struggles with depression and anxiety, substance use, parenting, care-giving, education, employment, economic stability, navigating the demands of daily life with a disability, and maintaining independence in older age.

Community Collaboration

Arrowleaf's Community Collaboration area of focus includes a wide range of resources and opportunities that connect people with other resources in our communities, strengthen our services in our other areas of focus, and make Southern Illinois more vibrant for all of us.

For example, we provide comfortable apartments to older adults in our community, help coordinate primary care providers for people in our region, provide training to healthcare providers on specialty topics, and support schools in their work with students who can benefit from additional emotional and academic support, and advocate our communities on a local and state level.

Youth Advisory Committee (YAC)

- To strengthen youth participation in the development and implementation of community-based substance use prevention services. Youth Advisory Committees provide young people with opportunities to take on leadership roles and responsibility for creating positive change.
 - YAC assists with the communication campaign, National Prevention Week activities, and other prevention efforts in the community (ie. distributing DTB flyers throughout the community).
 - Currently, we have an active YAC in Union County

Communication Campaign

- To promote healthy behaviors and work to change community norms
 - For SUPS, we must implement and maintain two communication campaigns. Both campaigns are implemented in Union County.
 - Campaigns include anti-vaping and underage drinking

National Prevention Week (NPW)

- A public education platform showcasing the work of communities and organizations across the country that are preventing substance use and misuse and promoting positive mental health. NPW is hosted during the second week of May to celebrate and promote year-round prevention initiatives.
 - Union County YAC members develop activities
 - NPW activities in our other counties are planned by the SUPS team with feedback from the school administration, community, and youth along with observations. For instance, for Johnson County high school students, we have teamed up with U of I Extension to organize an interactive event where students will gain firsthand experience and understanding the impairment of substances (ie, alcohol, marijuana use, and vaping).

Drug Take Back (DTB)

- To provide a safe, convenient, and responsible means of disposing of prescription medications, while also educating the public about the potential for abuse for medications.
 - Occurs twice annually (October and April)
 - Currently, we are finalizing plans for the DTB event in April

Resource Guide

Resource is updated annually. The guide identifies substance use disorder treatment and human service organizations (mental health counseling, sexual assault prevention, shelters, etc) across the southern seven counties in Illinois

Illinois Youth Service (IYS)

- This a self-report survey administered in school settings and designed to gather information about a variety of health and social indicators including substance use patterns and attitudes of Illinois youth.
 - 8th, 10th, and 12th grade students participate in the survey
 - The survey is administered every two years (even-numbers 2018, 2022, 2024, and so forth)
 - All of Johnson County schools are registered for this year!

My Generation Rx

- Educates students on the importance of using medications safely, teach drug refusal skills along with the ability to cope with high demands of life.
 - Our team is making this an annual offering for all 9th grade students across the southern seven counties (excluding those who are engaged in our youth prevention education curriculum).

Youth Prevention Education (YPE)

- YPE is provided using an evidence-based substance use prevention intervention curriculum designed to mitigate the risk factors linked to problem behaviors and build protection within the child to resist problem behaviors.
 - Too Good for Drugs The Mendez Foundation
 - The lessons and activities help to increase communication skills, better decision making, goal setting, forming healthy relationships, peer pressure refusal strategies along with learning how alcohol and other substances can affect their bodies, brains, and future plans.
 - This is offered throughout the seven counties for students in 4th grade high school | 10 lessons – core and booster

Substance use and its effect on the body are introduced with developmentally appropriate. For instance, in the youngest grades, the lessons develop an understanding of what is healthy to put in the body and what is not. This foundation prepares students for discussions about tobacco, alcohol and other drug use in later elementary years.

Here's the thing...

Our agency extends services throughout the southern seven counties of Illinois, which is the target service area for SUPS. Over the years, I've come to understand that to ensure the success of our program in these specific service areas, strategic implementation of our core services is essential. While each county we serve exhibits its own distinct characteristics, there are also commonalities that bind them together. By understanding these characteristics, we can tailor our services to meet the specific needs of each community effectively.

The Johnson County plan

Our ultimate goal is to synchronize all Johnson County schools to ensure that no child is left behind. With this in mind, our team has been diligently working on a plan. This plan was put into effect this academic school year.

Fall term – 4th (core); 7th grade (booster); and high school (core)

Spring term - 6th grade (core) and high school (core)

By implementing this arrangement for all schools, we aim to establish a foundation of consistency in YPE delivery. This consistency will not only contribute to the program's effectiveness but also reduce the risk of YPE burnout among students. Because YPE burnout is a real thing!

Johnson County Fall Data

These outcomes represent the number of students who attended at least 80% of the lessons and completed both pre- and post-assessments.

4th grade

Schools: VGS (2 classes), Buncombe/Cypress (2 classes), Goreville Elementary School (2 classes)

- 91 students
- Overall 17% increase

8th grade

Schools: VGS (2 classes), NSH, Goreville Jr/Sr High School (2 classes)

- 96 students
- Overall 3% increase

Johnson County Data

These outcomes represent the number of students who attended at least 80% of the lessons and completed both pre- and post-assessments.

High School

Schools: VHS (2 classes), Goreville High School (2 classes)

- 68 students
- Overall 12% increase

4th grade and high school have the largest jump!

4 out 5 schools participated 8th grade: 52 10th grade: 84 12th grade: 73

Crime Scene Investigators

You are a detective working on a special operations team called the Drug Identification Unit. You have been trained to recognize impairment in people under the influence of drugs and to identify the specific drug causing the impairment.

Your task is to identify the drug of abuse in an investigation using its case file and the evidence the file contains.

Page 22 – two reference charts: street drugs and prescription/over-thecounter drugs

As you receive each piece of evidence, review the effects observed by the witnesses or officers at the scene. Use the tables on page 22 to identify the drugs that cause those effects and eliminate the ones that don't.

Let's test it out

If there is evidence of confusion, which drugs cause confusion?

0r...

If there is evidence of vomiting, which drugs cause vomiting?

As you review the various pieces of evidence and draw your conclusions, record your answers on Drug Identification Report (page 23). Repeat this process with each new piece of evidence until you have identified the drug in question.

Case File #01

- Incident Report (filed by the officer on the scene)
 - Two Witnesses Statements
- Photographs from the crime scene
- Drug Chemistry Report the final document to confirm your conclusion

Synopsis:

On January 18, 2015, I was dispatched to 123 N. Franklin Street to respond to a complaint of a large crowd and loud music coming from an abandoned warehouse at this address. When I arrived at the scene, I suspected most of the people were under the influence of drugs. They were sweating and appeared to have high energy levels. I arrested two suspects for disorderly conduct. One additional suspect was arrested for drug possession.

Results of the Analysis

Item # 01: Pill was analyzed and found to contain MDMA; Net Weight: 300 mg Item # 02: Pill was analyzed and found to contain MDMA; Net Weight: 300 mg Item # 03: Pill was analyzed and found to contain MDMA; Net Weight: 300 mg Item # 04: Pill was analyzed and found to contain MDMA; Net Weight: 300 mg

CASE NUMBER 01

Four brightly colored pills found on the floor of the warehouse. Each pill was imprinted with a symbol. The symbols included a heart, star, alien face, and skull.

Evidence #2:

A pacifier was found 3 feet from where the pills were located.

What drug did your suspect use?

MDMA

Methylene-dioxy-methamphetamine is a hallucinogen commonly referred to as Ecstasy or Molly.

What were the other possible drugs in your case?

How did you determine the abused drug was MDMA?

Questions?
